
STODICT.

Get insight from the noise.

Millions of people around the world broadcast what they see and hear on public social media platforms, creating the world's first global sensor network of eyewitnesses.

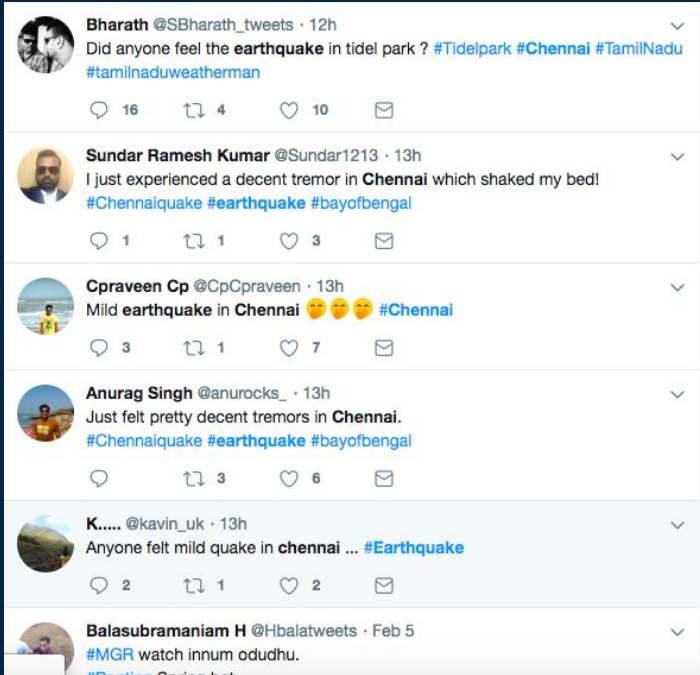

Within this massive sea of real-time social media, Stodict detects the earliest indications of high-impact events and critical breaking information.

Stodict transforms these early signals into real-time alerts about breaking stories from these off the radar content and help journalists to discover engaging and high quality content.

Stodict for finance provides early alerts important to financial professionals which helps them to take profitable decisions find better opportunities and have an edge.

Stodict alerts about breaking news before it's news.

The image shows a vertical scroll of six tweets on a white background. Each tweet includes a profile picture, the user's name and handle, the time since posted, the text of the tweet, and engagement icons (reply, retweet, like, and share).
